

Technology by us.

NTN is a new species, not to be confused with its current duckbilled relatives. It features an exclusive boot/binding interface superior to all else in the Telemark world:

New!

Freedom
ROTTEFELLA TECHNOLOGY

* The sideways release system of the NTN binding is not certified according to ISO standards.

ROTTEFELLA®

Rottefella crafts superior bindings for Nordic and Telemark skiing. We refine and reinvent them - constantly. We distil the skiing insights of our Norwegian heritage into cutting edge technology. We have been doing this - and only this - for more than 80 years. For us, it's not just about better bindings - it's about who we are.

Telemark-
bindings

2012/2013

ROTFEFELLA®

Powered by you.

The joy of skiing is individual and can only be experienced by you, the skier. But no matter your age, skill or the conditions, the thrill of skiing is always greater when you and your equipment work together as one. Our bindings are developed with the person standing on top of the skis in mind.

◀◀ **Maximum stability**

The NTN system can deal with variable snow conditions and takes full advantage of the ski's potential.

▶▶ **Maximum contact**

The NTN system ensures optimal contact between boot, binding and ski. The flex plate on the NTN binding is in contact with your boot throughout the turn.

◀◀ **Maximum balance**

The binding ensures good balance through turns and delivers better speed and control.

ROTTAFELLA®

Freedom

ROTTEFELLA TECHNOLOGY

New!

Rottefella Freedom is the binding for those who seek freedom and challenges off-piste. Its low weight, unique low-resistance walking mode and wide opening angle, all combine to make the joy of climbing to the top or letting it all out in virgin terrain even greater. The binding also has a progressive resistance and is the perfect choice for those who ski in loose snow or in mixed snow conditions, on and off prepared trails.

- » **Weight:** 1500 grams per pair
- » **Height:** 25 mm
- » **Rotation point:** 22 mm behind tip of boot
- » **Walking opening angle:** 60 degrees
- » **Heel lifter:** 35 mm and 65 mm
- » **Ski brake:** standard 115 mm

FREE RIDE™

ROTTEFELLA
TECHNOLOGY

Freeride gives you optimal edge grip and good control when the surface becomes hard and icy. With Freeride, you can utilize the capabilities of carving skis to the most. You get the maximum joy of skiing slopes regardless of the conditions. Naturally, Freeride also has a walking mode if you want to leave the slopes.

- ▶ **Weight:** 1940 grams per pair
- ▶ **Height:** 30 mm
- ▶ **Rotation point:** 22 mm behind tip of boot
- ▶ **Heel lifter:** 50 mm
- ▶ **Ski brake:** standard 115 mm

Accessories

NTN Power Tubes

Two available tensions:

	Colour	Tension	Size
	Green:	Soft Standard	Small/Large
	Blue:	Medium	Standard Large

NTN Ski brake

125 mm

NTN Mounting plate and heel

The NTN mounting kit gives users the possibility for a second ski pair. Mount the plate and heel to the ski and slide the toe piece over.

ROTTFELLA®

Rottfella 75mm bindings

Cobra R8

The Cobra R8 hardwire binding is designed for maximum downhill performance with 75 mm boots. The combination of a solid housing, long compression springs, and a large base plate underfoot deliver superb edge control and power transfer under all conditions.

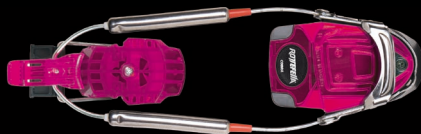

Long binding: size 26 - 32 mondo

Short binding: size 23 - 28 mondo

Weight: 1810 gr.

Standard height: 30 mm

10 mm spacer increases the height to 40 mm.

Cobra R4

The Cobra R4 has all the skiing qualities of the Cobra series and a pivot point that makes touring easy by reducing progressive forward flex. This binding has less progressive forward flex than the Cobra R8. Since the cable can be adjusted to fit several foot sizes, Cobra R4 is highly suitable for ski rentals.

One size: fits size 23 - 32 mondo

Weight: 1640 gr.

Height: 30 mm
